

Faculty	Engineering and Technology		
Assessment Name (Eg: End/Sup)	Internal	Paper Code	CEOL/A26/I2
Module Name	Essentials of Linux	Module Code	C6-EOL-20
Semester (E.g Jul-Dec-2021)	Jan-June 2026	Submission Mode (E.g Turnitin, blackboard, hardcopy)	blackboard
Total Marks	100	Duration (E.g., mins/hours/days/weeks)	2 weeks
Assessment Type (Eg: Written/Practical/Submission)	Assignment	Submission Date (Applicable for submission-based exams only)	10/04/2026

Instructions

1. Answer all questions
2. The assignment should accompany with Cover Page. Include all essential details: Student ID and name; Department name; Module name and Code
3. Use Font size 12 points Times Roman with a line spacing of 1.5. Insert page numbers.
4. Make use of proper citations and referencing using Harvard style.
5. Material which is plagiarised will not be marked.
6. Save the file in your name (e.g. Jane_ John_Assign2.docx/ .doc).
7. Upload and submit the assignment through Blackboard on or before the prescribed due dates.
8. Submission Due Date: 10 April 2026
9. Late submissions will not be marked
10. Usage of AI tools in this assessment is not allowed.
- 11. Your final submission on Blackboard will consist of two files: your detailed written proposal and your narrated PowerPoint presentation.**

Project: A Proposal for the Future of Botho University's Desktop Environment

Objective:

This project requires you to conduct a comprehensive investigation into the feasibility of migrating a university's computer labs and administrative machines from the Windows operating system to a Linux-based environment. You will then synthesize this research into a formal, persuasive proposal and a recorded presentation, both directed at the management of Botho University.

Part 1: Research & Investigation

Your first task is to conduct a thorough investigation into the implications, benefits, and challenges of an enterprise-level migration from Windows to Linux. It is up to you to identify and critically analyze all the relevant factors that university management would need to consider before making such a significant decision. Your research should be broad and deep, covering all potential impacts on university operations, from the IT department to the end-users (students, faculty, and staff). **(30 points)**

Part 2: The Scenario & Formal Proposal

Scenario:

Botho University is currently undertaking a strategic review of its IT expenditures and operational efficiency. The university's leadership is looking for innovative ways to reduce costs while enhancing the technological resources available to students and faculty. Currently, the vast majority of the university's computers run on the Microsoft Windows operating system, which involves significant licensing and maintenance costs. A suggestion has been made to explore migrating university computers to a Linux-based operating system. However, the university management team is cautious. They are concerned about potential disruptions to teaching and administrative work, the compatibility of essential academic software, and the technical skills required from staff and students.

Your Task (Written Proposal): (30 points)

Write a formal proposal to the management of Botho University that argues either **FOR** or **AGAINST** implementing a pilot program to migrate one of the university's computer labs to a Linux distribution (such as Linux Mint or Zorin OS). This document should be detailed, professional, and persuasive, forming the foundation of your argument.

Part 3: The Presentation**Your Task (Recorded Presentation): (25 points)**

Create a 10-15 slide PowerPoint presentation that summarizes your formal proposal. This presentation will be uploaded to Blackboard for the university management to review asynchronously (it will not be presented live). Therefore, the presentation **must** include:

Voice-Over Narration: You must record audio narration for each slide, explaining the key points as if you were presenting in person.

Professional Animations & Effects: Use tasteful animations and transitions to guide the viewer's attention and keep them engaged. The presentation should flow smoothly without a live presenter.

Your final submission on Blackboard will consist of two files: your detailed written proposal and your narrated PowerPoint presentation.

Grading Rubric	Total Points: 100
1. Research & Critical Analysis (30 points)	
Excellent (26-30 pts): Student independently identifies and provides deep, well-supported analysis of the critical factors relevant to a university migration.	
Good (21-25 pts): Student identifies most of the key research points with good evidence.	
Satisfactory (16-20 pts): Student identifies some, but not all, of the important factors.	
Needs Improvement (0-15 pts): Research is minimal, fails to identify key issues, or lacks evidence.	
2. Written Proposal: Argument & Scenario Application (30 points)	
Excellent (26-30 pts): The written proposal presents a clear, logical, and highly persuasive argument, masterfully tailored to the Botho University scenario.	
Good (21-25 pts): The argument is clear and well-supported, and the connection to the scenario is appropriate.	
Satisfactory (16-20 pts): An argument is present, but it may be unclear or not well-supported. The connection to the scenario is weak.	
Needs Improvement (0-15 pts): The proposal lacks a clear argument or fails to address the specific scenario.	
3. Recorded Presentation: Communication & Delivery (25 points)	
Excellent (22-25 pts): The presentation is highly professional, visually engaging, and effectively summarizes the proposal. The voice narration is clear and confident. Animations enhance the message.	
Good (18-21 pts): The presentation is clear and professional. Narration is good, and animations are used appropriately.	
Satisfactory (14-17 pts): The presentation conveys the basic points, but may lack visual polish. Narration is understandable but may be unenthusiastic or unclear in parts.	
Needs Improvement (0-13 pts): The presentation is poorly designed, difficult to follow, or missing key requirements (like narration).	

4. Professionalism & Clarity (15 points)

Excellent (13-15 pts): Both the written proposal and presentation are exceptionally well-written, professionally formatted, and free of errors. Citations are properly formatted.

Good (10-12 pts): Both deliverables are clear and well-organized, with few minor errors.

Satisfactory (7-9 pts): One or both deliverables are understandable but contain several errors that detract from professionalism.

Needs Improvement (0-6 pts): Deliverables are difficult to understand due to poor clarity, organization, and/or numerous errors.

***** **End** *****
