Part 1. Threat-hunting fundamentals

1 Introducing threat hunting

1.1 Cybersecurity threat landscape

1.2 Why hunt?

1.3 Structuring threat hunting

Coming up with a hypothesis

Testing the hypothesis

Executing the threat hunt

1.4 Threat hunting vs. threat detecting

1.5 The background of a threat hunter

1.6 The threat-hunting process

1.7 Overview of technologies and tools

2 Building the foundation of a threat-hunting practice

- 2.1 Establishing a threat-hunting practice**
- 2.2 Developing a threat-hunting hypothesis**
 - Threat scenario*
 - Threat-hunting play*
 - Formalizing the hunt hypothesis*
- 2.3 Cyber threat intelligence**
 - Threat intelligence types*
 - The Pyramid of Pain*
- 2.4 Security situational awareness**
- 2.5 Cognitive-bias challenges**
- 2.6 MITRE ATT&CK**
- 2.7 Frameworks**
 - Threat-hunting framework*
 - Existing frameworks and standards*
- 2.8 Building maturity over time**
 - Maturity model*
 - Maturity levels*
- 2.9 Exercises**

Part 2. Threat-hunting expeditions

3 Your first threat-hunting expedition

- 3.1 Hunting for compromised endpoints**
 - Threat scenario*
 - Research work*
 - The hypothesis*
 - The hunting expedition*
- 3.2 The threat-hunting process**
 - Preparation*
